DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 46-50, drawn to a geothermal heat exchanger, classified in class 62, subclass 260.
 - II. Claims 77-80, drawn to connection pipes for a heat exchanger, classified in class 165 subclass 104.33.
 - III. Claims 81-96, drawn to a refrigeration system, classified in class 62, subclass 324.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the geothermal heat exchange can function in any refrigeration system. The subcombination of invention I has separate utility and can be used in home refrigeration units to save energy, renewable energy heat exchanger, the piping of invention II can be used in a variety of refrigeration systems to connect compressors, heat exchangers, valves and move refrigeration. Additionally, the refrigeration system as claimed in invention III is a specific refrigeration

Art Unit: 3744

system requiring a compressor, heat exchanger and piping between these elements in a specific manner.

3. The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

4. A telephone call was made to Brent Matthias on April 15, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Comment [F1]: You need to indicate that you have made a telephone call to the attorney in the write up. Also, after you have called the attorney, you need to establish that there would be some burden of search placed on the Examiner as the basis for the restriction.

Comment [e2]: Called attorney and explained burden of search in paragraph 2
